Job-Beschreibung

Level up!

Nintendo Co., Ltd., headquartered in Kyoto, Japan, has been providing a wide range of entertainment products and experiences since its founding in 1889, beginning with the manufacture and sale of Hanafuda playing cards. Since the 1983 release of the Family Computer (Famicom) system in Japan, and continuing through Nintendo Switch 2, Nintendo's focus has been the development, manufacturing, and sale of its gaming systems and software.

At Nintendo, we bring together employees with a wide range of characteristics and work together towards a common goal – to put smiles on the faces of people all over the world.

Tasks

- Taking over various roles/responsibilities in projects across various IT systems for the My Nintendo Store, incl. Frontend, Middleware and Backend
- Being the point of contact for internal customers like Logistics or Finance and supporting them with their different requirements
- Handling tickets and coordinating all related activities from requirements management, alignment with all relevant parties, realisation, testing to monitoring during and after deployment
- Coordinating the external service partner
- Monitoring the different system functions and interfaces to connected systems (log files), especially during product releases or peak business phases
- Managing users and authorizations on the Middleware system

Requirements

- Degree in IT ideally with focus on IT project management or similar field or several years of equivalent professional experience
- Proven experience with demand management and requirement management
- Excellent communication skills even in stressful situations in English and German (written and spoken)
- Ability to take over ownership for the different projects, project tasks and tickets combined with the ability to work independently, self-organized and solution-oriented
- Teamwork-oriented mindset, structured working manner as well as proactive way of working
- Ability to switch between different topics and roles
- Very good analytical skills
- Good understanding of business processes and its dependencies especially in an eCommerce environment
- Skills in SQL and understanding of web-services and APIs
