Your mission

- You are responsible for the extensive Windows server infrastructure of our client-based online games
- You are in contact with our developers and represent the interests of your team
- You are open-minded towards innovations and changes to the existing systems, and you also introduce them independently
- You advise our internal product and project teams as a technical contact person
- You support internal developers and external game studios in planning game maintenances
- You independently carry out planned game maintenances, content updates, test system installations and troubleshooting in case of malfunctions
- Together with your team, you will develop hardware resizings, deployment routines and automation concepts
- You will participate in the freely schedulable on-call service for 24/7 operations

Your tech stack

- Windows Server (2016 - now), ActiveDirectory, Powershell, Microsoft SQL Server, Hyper-V, Azure

Your skills

- You have very good knowledge and experience in the administration of Windows server systems
- You are proficient in Powershell and also scripting
- You have experience with automating jobs and want to work on a custom solution for it
- You can immediately assign topics like GPO, NPS, RAS, SQL-DBs, HyperV, WSUS, DNS , Firewalls and CI/CD and know how to use them best
- You like to work in a team and want to contribute and constantly expand yourself and your own skills
- You think outside the box, question processes and critically analyze possible risks

Your Gameforge setting

- An international company awaits you! English is our company language, because employees from over 35 nations are part of our team
- We work hybrid! You agree with your manager and your team to what extent you work in the office or from home
- We support your personal and professional development! With language courses, team
